22. FEEDBACK SYSTEM

Feedback is an essential part of effective learning. Govt. Pharmacy College Rakkar has developed a system of feedback collection in all programs which focuses on academics. Structured feedback collection enhances learning and improves assessment performance. Feedback is collected on the curriculum by teachers, students, alumni, and employers at the end of every academic year. Other feedbacks taken are Graduate exit, feedback by students on each teacher, and feedback by parents after the parent-teacher meeting. The collected feedback is analysed, and actions are taken according to the suggestions and needs of the stakeholders.

23. Criteria for evaluation and selection of suppliers

Govt. Pharmacy College Rakkar has constituted various committees including LPC to look into the procedures related to the selection of suppliers.

Selection of suppliers

Suppliers play a critical role in helping companies succeed. In order to find the right ones, businesses need to consider a number of critical factors, including:

- price
- value for money
- quality
- reliability
- responsiveness
- flexibility

Evaluation of suppliers

In procurement, supplier evaluation means a formal assessment of suppliers to measure their performance against various criteria and determine if they meet the organizational needs. The objective is to create a best-in-class and low-risk portfolio of available suppliers for use.

Supplier evaluation is a continuous process for procurement departments and is also a pre-qualification step in the process of purchasing.
